Embroidered Pot Holder

MATERIAL USED

Linen or cotton pot holder
Embroidery hoop
Scissors

STITCHES USED

Please refer to the sketch to reference the stitches used and the number of strands used. In the embroidery pattern the color code of Anchor Embroidery Floss is indicated by "#".

INSTRUCTIONS

You can apply this embroidery pattern onto any linen or cotton pot holder. Print the pattern. Trace the pattern onto the pot holder (see tips for transferring patterns). Embroider stems with stem stitch. Embroider the leaves and the cherries with chain stitch. Embroider flowers with woven wheel stitch and satin stitch.

TRANSFERRING PATTERNS

There are several methods for transferring embroidery designs to fabric. Different ways work better for different types of fabric. Light method (this method works for light-weight and light-colored fabrics). Tracing patterns using a light table or a window. Tape embroidery design to a table or window and secure the fabric over it so you can see the pattern lines through the fabric. For tracing pattern you can use a water-soluble fabric marker or an ordinary pencil. Carbon paper method (this method works for darker colored fabrics). Place your fabric on a hard surface, set a piece of carbon paper on top of it (use a color carbon paper that contrasts the color of fabric) and the pattern on top of that. Trace the pattern lines with a pencil. Silk paper method (this method works well for thick fabrics like felt). Trace the pattern onto silk paper, pin the paper to the fabric, and stitch right through the paper and the fabric together. When you finish remove the paper.

WASHING INSTRUCTIONS

All our threads are produced in accordance with Oeko-Tex standards. PH values are tested and all our colour dye lots adhere to Global fastness standards. However, it is important to follow our thread washing instructions. Particularly with dark colors, excess dye can remain on the thread. To minimise any potential bleeding of excess dyestuff it is important to wash the products in THE HOTTEST TEMPERATURE possible, in accordance with the specifications of the fabrics, and use a large amount of water. Please make sure that you also follow the fabric washing instructions where appropriate. As a precaution, you can also use decolorating sheets that you can find in any supermarket.
